

AFGS Series

A floodlight for general purpose floodlighting applications with a wide-beam distribution. Available with 1/2" N.P.T. with an adjustable knuckle.

Housing

Die-cast aluminum construction with hinged door for easy servicing by loosening two stainless steel screws on the side opposite the integral hinges. One-piece silicone gasket provides watertight and dust-tight operation.

Optics/Lens

Semi-specular anodized aluminum provides smooth uniformity and can easily be removed by loosening two screws to gain access to ballast components. Tempered clear glass lens with silicone gasket is secured to door with four (4) stainless side-mounted clips.

Electrical

Socket is mogul base porcelain 4kv pulse rated. HID ballast is up to 150W/175W high pressure sodium or 50W-175W metal halide core and coil, NPF or HPF.

Mounting

Knuckle Arm: Heavy-duty die-cast aluminum arm has 1/2" threaded end (N.P.T.) for easy mounting to standard J-boxes or mounting plates. Adjustable knuckle arm with serrated teeth and stainless steel locking bolt insures aiming is locked.

Finish

Standard finish is thermoset bronze powder coating.

Suitable for wet locations
Lamp included
