## Smart™ Light Specifications

The 200 watt Smart™ Area is designed to replace HID light sources of up to 750 watts. This is accomplished with sealed high brightness light modules with precision control TIR type optics.

### Construction

Housing is die-formed made from low-copper 5052 aluminum, heavy duty, structurally rigid and vibration resistant. Heatsink fins are 0.040" thick made from low copper aluminum 5052 alloy with maximum contact with the housing for maximum heat dissipating surface area for the efficient cooler operation. 3 available mounting options.

### Optics/Lens

The 200 watt Smart™ Area contains 4 - 50 watt IP67 sealed light modules and are easily replaceable. Modules are available in both 45 degree (standard) and 85x135 degree (optional) beam patterns.

### Electrical

High power Cree XT-E LED source, with performance of greater than 100 lumens per watt. Available in range of Color Temperature 4500-5500K, CRI of 70 or greater. LED Drivers: UL/CSA recognized component to meet UL8750 & EN61347 (USR/CNR - E328335). Suitable for input power at 100-277VAC, Minimum power factor >0.95 with an operating temperature range of -22-140 degrees F / -30C to +55C. Dimmable and motion sensor control compatible.

### Finish

Gloss Black finish is standard. Other optional finishes available on request.
